

THE SAME TECHNOLOGY THAT BRINGS YOU THIS...

AURiVEST
INVESTMENT
BRINGS SPACE AGE
TECHNOLOGY INTO
THE DENTAL LAB!

The Aerospace Industry
demands that invested castings
retain exceptional detail and
close dimensional tolerances.

The advanced technology
specifically developed for the
world's most sophisticated
aircraft components was used to
formulate **Aurivest Investment**.

If you think that making a better
restoration isn't exactly "rocket
science"... think again.

BRINGS YOU THIS.

Aurivest

INVESTMENT

Aurivest delivers these benefits and more:

- **Compatible with any dental alloy** (high noble, palladium-based, titanium, non-precious);
- **Suitable for all Pressable Ceramics;**
- **Rapid burnout;**
- **Stable to 1800°F (982°C);**
- **Easy to mix and pour for all types of ring and ringless systems;**
- **Low viscosity and fine grain for precise detail and exceptional fit;**
- **High strength and excellent thermal conductivity;**
- **Freeze stabilized liquid.**

Discover how Aurivest Investment's space age technology can make investing easier and more precise for your laboratory.
